NYU CME welcomes you to our fourth series of biennial CME conferences for radiologists. This series of educational programs is designed to provide state-of-the-art education for radiologists.

NYU Radiology in Italy

Head to Toe

23rd Annual Morton A. Bosniak CT/MRI: Head to Toe

A Three-Part Conference:

at the Grand Hyatt New York
December 13–18, 2004

NYU Faculty

Andrew W. Litt, M.D., F.A.C.R.
Professor of Radiology
New York University School of Medicine

Robert M. Balfe, M.D.
Chairman, Radiology
Vice Chair, Education, Department of Radiology
New York University School of Medicine

George Nomikos, M.D.
Professor of Radiology
New York University School of Medicine

Chadwick S. Gerberding, M.D.
Assistant Professor of Radiology
New York University School of Medicine

David A. Bluemke, M.D., Ph.D.
Professor of Radiology
University of South Florida School of Medicine

Karen A. Mourtzikos, M.D.
Assistant Professor of Radiology
New York University School of Medicine

Susan L. Campeas, M.D.
Assistant Professor of Radiology
New York University School of Medicine

Bachir Taouli, M.D.
Assistant Professor of Radiology
New York University School of Medicine

Meng Law, M.D.
Vice Chair, Financial Affairs
New York University School of Medicine

Edmond A. Knopp, M.D.
Associate Professor of Radiology
New York University School of Medicine

Debra A. Martin, M.D.
Professor of Radiology
New York University School of Medicine

Michelle W. van Hagen, M.D.
Associate Professor of Radiology
New York University School of Medicine

Georgeann McGuinness, M.D.
Program Director
New York University School of Medicine

Karen A. Aalbersberg, M.D.
Assistant Professor of Radiology
New York University School of Medicine

Alec J. Megibow, M.D., M.P.H., F.A.C.R.
Professor of Radiology
New York University School of Medicine

Susan T. King, M.D.
Professor of Radiology
New York University School of Medicine

Francis Collins, M.D.
Director, National Institutes of Health

Julie E. Jones, M.D.
Assistant Professor of Radiology
New York University School of Medicine

Eli A. Zinreich, M.D.
Associate Professor of Radiology
New York University School of Medicine

Aaron Blank, M.D.
Assistant Professor of Radiology
New York University School of Medicine

Eugene D. Lifschitz, M.D.
Chief, Thoracic Imaging
New York University School of Medicine

Janice Ford Benner
Director, Continuing Medical Education
New York University School of Medicine

NYU Radiology in Italy

Head to Toe

Educational Objectives

1. Apply new techniques for body CT and MRI, and the participant should be able to:

- Perform a comprehensive scan of the body using CT and MRI
- Interpret and recognize the clinical significance of findings
- Apply appropriate imaging techniques to specific body regions

2. Acquire basic familiarity with CT and MR anatomy

- Understand the normal anatomy of the body
- Recognize common anatomical variations

3. Understand the practical value of established and evolving imaging techniques

- Recognize the advantages and limitations of established imaging techniques
- Stay informed about the latest developments in imaging technology

4. Become aware of new information that may impact clinical practice

- Keep up-to-date with the latest research findings
- Understand the implications of new imaging technologies

5. Understand the role of CT and MRI in the evaluation of specific pathologies

- Recognize the indications and limitations of CT and MRI in various clinical scenarios
- Interpret the findings in the context of patient management

6. Engage in intensive interactions with faculty and guests

- Participate in interactive educational sessions
- Engage in discussions with faculty and other participants

Course Format

The program is divided into three parts: plenary lectures, afternoon workshops, and hands-on sessions.

1. Plenary Lectures

- Morning sessions on CT and MRI anatomy, techniques, and indications
- Afternoon sessions on the latest developments in imaging technology

2. Afternoon Workshops

- Small group sessions focusing on specific body regions and imaging techniques
- Hands-on experience with imaging equipment
- Interactive case discussions

3. Hands-on sessions

- Practice setting up scans and interpreting findings
- Apply imaging techniques to real clinical scenarios

Conclusion

We hope you'll plan on joining us at one of these CME courses.
