Head to Toe Imaging Conference

Head to Toe Imaging Conference 2008

Visiting MRI Fellowships

1. Based on new and advanced imaging techniques in MR, PET, US, non-invasive vascular imaging, and other modalities. Additionally, new concepts and applications are being developed for these imaging methods as they pertain to specific diseases.

2. Based on new imaging algorithms utilizing MR, PET, CT, US, and other modalities.

Visiting MRI Fellowships are available by arrangement with the NYU Department of Radiology. Familiarity with the fundamentals of MRI, including body, thoracic, musculoskeletal, cardiac, and breast imaging, is expected. The purpose of these fellowships is to provide a comprehensive imaging review, an opportunity to observe the unique interests of each registrant, and to update their skills and gain exposure to advanced applications and image analysis.

Fellowships are available by arrangement with the NYU Department of Radiology. They provide an opportunity to observe the unique interests of each registrant, update their skills, and gain exposure to advanced applications and image analysis.

Day 1: Musculoskeletal Imaging

Day 2: Breast Imaging

Day 3: Cardiovascular Imaging

Day 4: Thoracic Imaging

Day 5: Cardiac Imaging and Women's Imaging
