The Essentials of Neuroradiology and Head & Neck Imaging:

Ways to Improve Your Clinical Practice

February 1–3, 2007
Four Seasons Resort Hualalai, The Big Island of Hawaii

The Post-Graduate Medical School of the New York University School of Medicine is committed to improving patient care through continuing medical education.

Statement of Need
Due to the rapidly evolving technology found in MRI and CT, there is a need for education in new clinical applications, techniques and interpretation. Maintenance of certification requires continued review of essential imaging techniques in all areas of radiology.

Target Audience
This course is appropriate for general radiologists and neuroradiologists in clinical practice interested in a comprehensive review of neuroradiology and head & neck imaging with ample opportunity for discussion and interchange of ideas. It will also have relevance for neurologists, neurosurgeons and otolaryngologists.

Course Description
This four-day course (Monday–Friday) is designed to provide a comprehensive review of all aspects of neuroradiology and to introduce the latest advances in neuroimaging. The format will primarily consist of didactic lectures by the NYU Neuroradiology and Guest Faculty. Topics of discussion will include relevant disease processes affecting the brain, spine, and head & neck encountered in daily practice. Course participants will have ample opportunity to interact directly with the course faculty in question-and-answer sessions and will be encouraged to discuss specific issues that they consider interesting and/or controversial. It is the intent of the organizers to provide practical clinical material to the audience.

Educational Objectives
1. Based on new and advanced imaging techniques, review the fundamentals of current neuroradiology practice and enhance your foundation in the basics of head & neck imaging with specific regard to practical image interpretation.
2. Based on new state-of-the-art imaging technology, utilize new strategies/pulse sequences in MR and apply this understanding to enhance clinical practices.
3. Based on the most up-to-date imaging protocols, review the fundamentals of neuroimaging of the brain, spine and head and neck for more accurate diagnosis and optimal patient care.
4. With the latest imaging technology, assess advanced imaging techniques including MR diffusion, MR perfusion, MRS, MRA and their application in clinical practice in the evaluation of brain tumors, stroke and other conditions.

Accreditation Statement
The NYU Post-Graduate Medical School is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Credit Designation
The NYU Post-Graduate Medical School designates this educational activity for a maximum of 18.75 AMA PRA Category 1 credits." Physicians should only claim credits commensurate with the extent of their participation in the activity.
