The NYU Sports Medicine Imaging Course

Overview & Purpose Statement

There are many recent technological advances in imaging techniques which can be applied in current clinical practice. Maintenance of certification requires continued review of essential imaging techniques in all areas of radiology, including musculoskeletal imaging.

Target Audience

This course is designed for practicing and clinical radiologists, particularly those who concentrate in Musculoskeletal imaging. Orthopaedic surgeons will also be interested in this program.

Accreditation Statement

The NYU Post-Graduate Medical School is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit Designation

The NYU Post-Graduate Medical School designates this educational activity for a maximum of 21 AMA PRA Category 1 credit(s)™. Physicians should only claim credits commensurate with the extent of their participation in the activity.

- Friday, June 1, 2007: 7.25 credits
- Saturday, June 2, 2007: 7.25 credits
- Sunday, June 3, 2007: 6.50 credits

Disclosure Statement

The NYU Post-Graduate Medical School adheres to ACCME Essential Areas and policies, including the Standards for Commercial Support regarding industry support of continuing medical education. In order to resolve any identified Conflicts of Interest, disclosure information is provided during the planning process to ensure resolution of any identified conflicts. Disclosure of faculty and commercial relationships as well as the discussion of unlabeled or unapproved use of any drug, device or procedure by the faculty will be fully noted at the meeting.

Course Description

This three-day course (Friday, Saturday and Sunday) is designed as a state-of-the-art update on all facets of sports medicine imaging for the radiologist and the clinician. Detailed lectures on MRI of all articulations will be covered. In addition, updates on cartilage, post-operative imaging and the variable appearances of traumatic marrow disorders will be featured. There will also be interactive MR arthroscopic correlation sessions separately for the knee, shoulder and wrist, as well as a physical examination demonstration of the common presentations of several sports injuries. In addition, we will offer focused hands-on workshops on musculoskeletal ultrasound.

Educational Objectives

- Based on advanced imaging techniques, identify the optimal sequences of imaging cartilage, given patients with sports injuries.
- Following arthroscopy, review and assess the usual post-operative appearances in order to evaluate musculoskeletal regions, based on the guidelines of evolving technology.
- In order to improve diagnostic acumen, apply advanced imaging techniques for internal derangements of the knee, shoulder, wrist and ankle.
- In order to interpret clinical indications, define the anatomy of the wrist, hand and foot, so that patients will receive optimal benefit of the newest evidence-based diagnostic and therapeutic options.
- Given patients who present with chronic or acute knee pain, more effectively diagnose a broad spectrum of internal knee disorders, based on state-of-the-art MR imaging applications.
- Based on up-to-date imaging criteria, improve your ability to assess imaging features of the hip and pelvis in order categorize patients into those that will benefit from conventional medical management versus those who will require referral for surgical procedure.
