*Very Limited
Enrollment*

• **April 27–28, 2007**
(Friday–Saturday)

The Raleigh Hotel
South Beach, Miami

Course Director: Michael Macari, M.D.
Associate Professor of Radiology
New York University School of Medicine

General Information

Purpose Statement

The current role of virtual colonoscopy as related to colon imaging is significant to radiologists interested in developing and implementing virtual colonoscopy into their practices. This workshop has been designed to demonstrate and teach “hands-on” techniques that will enable the participant to detect colorectal polyps at Virtual Colonoscopy.

Target Audience

Virtual Colonoscopy workshops have been designed for radiologists both in private practice and academic centers.

Description

This one and one-half day workshop has been designed to review current aspects of colon cancer and colon cancer screening. The format for this course is hands-on training using workstations loaded with approximately 25–40 “endoscopically proven” data sets, chosen to include a mix of normals, abnormal and pitfalls. In addition to the hands-on experience, didactic lectures are included on patient preparation, data acquisition, current screening techniques, and how Virtual Colonoscopy fits in with overall patient management.

Educational Objectives

- In order to more effectively detect colorectal polyps, identify the utility and potential limitations of using virtual colonoscopy, as compared to routine colonoscopy.
- In an effort to better screen your patients, evaluate the role and application of virtual colonoscopy as it relates to obtaining optimal patient care.
- Based on the most up-to-date screening methods, more effectively use the workstation through hands-on experience, in order to improve your interpretation skills in evaluating the colon.

Disclosure Statement

The NYU Post-Graduate Medical School adheres to ACCME Essential Areas and policies, including the Standards for Commercial Support regarding industry support of continuing medical education. In order to resolve any identified Conflicts of Interest, disclosure information is provided during the planning process to ensure resolution of any identified conflicts. Disclosure of faculty and commercial relationships as well as the discussion of unlabeled or unapproved use of any drug, device or procedure by the faculty will be fully noted at the meeting.
