Statement of Need
Continuous technological advances in imaging techniques need to be applied in current clinical practice. In addition, maintenance of certification requires ongoing review of essential techniques involving abdominal imaging, women’s imaging, breast as well as thoracic imaging.

Target Audience
This course has been designed for clinical and academic radiologists performing body and breast imaging.

Course Description
This four-day course is intended to provide an overview of current state-of-the-art imaging techniques and applications in abdominal/pelvic, thoracic, cardiovascular, obstetric/gynecologic and breast imaging. Lectures will focus on the appropriate utilization of CT, MR, and ultrasound in oncology, trauma, cardiovascular disease, inflammatory conditions and pregnancy. A practical approach to image interpretation will also be emphasized through the use of both didactic lectures and case-based review.

Educational Objectives
1. Use state-of-the-art multidetector CT, MR and ultrasound to improve diagnostic acumen in various disease processes in the chest, abdomen and pelvis.
2. Use the latest MDCT scanning methodology, to increase detection of colorectal polyps and recognize the utility and potential limitations of virtual colonoscopy relative to optical colonoscopy.
3. Optimize imaging protocols for specific clinical indications when evaluating patients with cardiovascular disease, by utilizing both state-of-art CT angiography and MR techniques.
5. Establish appropriate imaging algorithms for the evaluation of various disorders that cause abdominal and pelvic pain in the pregnant patient to more effectively diagnose these disorders.

Chatham (Cape Cod)

Chatham, Massachusetts is located on the elbow of Cape Cod, halfway between Falmouth and Provincetown. Once a quiet farming and fishing community, Chatham has become a vibrant tourist destination known for its expansive and varied beaches, seals, old historic houses and museums, in addition to its numerous shoppes and fine restaurants. The resort we selected, the Chatham Bars Inn, is a 10-minute walk to town so you can enjoy its cultural, dining and shopping diversions. Please visit their website for more information (www.chathaminfo.com). Summertime temperatures average 70 degrees in Chatham which is surrounded on almost 3 sides by navigable waters.

How to Reach Chatham

Chatham is 90 minutes from both Boston's and Providence’s airports and approximately 4 hours’ drive from New York City. Driving directions are found on the Chatham Bars website (www.chathambarsinn.com). Chatham is only 30 minutes from Hyannis (with limited plane service on Cape Air from Boston).
