The Department of Radiology Presents:

37th Annual Morton A. Bosniak

Head to Toe Imaging Conference

Provided by the NYU School of Medicine

New York Hilton Midtown
December 17–21, 2018

Monday, Dec. 17  Musculoskeletal Imaging & PET Imaging
Tuesday, Dec. 18  Thoracic Imaging & Cardiac Imaging
Wednesday, Dec. 19  Breast Imaging & Emergency Imaging
Thursday, Dec. 20  Abdominal Imaging & Interventional Radiology
Friday, Dec. 21  Neuroradiology & Pediatric Imaging
General Information

CONFERENCE LOCATION
New York Hilton Midtown
1335 Avenue of the Americas (53rd Street)
New York City

It’s all about the location! Located in the heart of New York City in Midtown Manhattan, the stylish New York Hilton Midtown hotel is within walking distance from New York’s premier attractions such as Times Square, Radio City Music Hall, Fifth Avenue shopping, Rockefeller Center, Broadway, Central Park, The Museum of Modern Art (MOMA) and many more iconic New York landmarks. Stop by the theatre & transportation desk for tips, tickets and travel in and around the city.

New York Hilton Midtown hotel guestrooms are spacious and stylish with a comfortable work area. All guest rooms feature marble baths, flat-screen TVs and WiFi.

Stay active during your stay in the hotel’s 8,000 sq. ft. fitness center. This Midtown Manhattan hotel offers a wealth of services and amenities designed with comfort and convenience in mind!

CE Credits
Category A credits will be offered — pending approval from the ASRT.

Self-Assessment Module (SAM)
Self Assessment Modules (SAMs), allowing registrants to obtain ABR SAM credit, will be offered daily at no additional charge.

Red text throughout the program indicates free daily SAMs. A total of 16.5 SAMs will be offered.

*Pending approval from the ABR

Accreditation Statement
The NYU School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Disclosure Statement
The NYU School of Medicine adheres to ACCME accreditation requirements and policies, including the Standards for Commercial Support regarding industry support of continuing medical education. In order to resolve any identified conflicts of interest, disclosure information is provided during the planning process to ensure resolution of any identified conflicts. Disclosure of faculty and commercial relationships, as well as the discussion of unlabeled or unapproved use of any drug, device or procedure by the faculty, will be fully noted at the meeting.

Special Needs
NYU School of Medicine, in compliance with the legal requirements of the Americans with Disabilities Act, requests any participant of this CME course who is in need of accommodation to submit written requests to our office at least one month prior to the course date.

Dietary Restrictions
Please indicate any dietary restrictions on the registration form or online form.

Special Topics/Questions
If there is a specific topic or question that would help fulfill your educational needs, please submit it on the registration form or online form.
Overview

Target Audience
The program is designed for clinical radiologists in either general or specialized practice, and is appropriate for radiologists in training. Familiarity with the fundamentals of CT, MR, PET, and US technology and applications, as well as basic anatomy, is assumed.

Statement of Need/Course Description
The 37th Annual Morton A. Bosniak Head to Toe Imaging Conference offers an intensive 5 day program reviewing Neurologic, Musculoskeletal, Pediatric, Abdominal, Thoracic, Cardiac, Breast, Emergency, PET/CT and Interventional Radiology. Its continued focus on safety and quality issues, including radiation exposure and contrast reactions and their management, crosses all sub specialty areas. Due to tremendous growth in the science of imaging and practice of radiology, it is imperative that radiologists continually update their skills and gain exposure to advances in the field. Maintenance of certification requires continued review and adoption of essential and cutting edge imaging techniques in all modalities, covering the entire body. We offer daily Self-Assessment Modules (SAMs) with SAMs credit in key areas of high import or with recent clinical advances.

Based on learners’ feedback, and the proven effectiveness of ‘case-based’ learning, the format of the course has been modified to incorporate heavily case-based afternoon sessions, which integrate and apply themes and topics covered in the earlier didactic sessions.

Comparative effectiveness research as it applies to imaging is incorporated throughout the course, allowing immediate application to clinical practice, with an eye towards quality, safety, and the trend towards ‘accountable care organizations’. Utilization of standardized imaging strategies, developed by collaborative teams of imagers and clinicians attentive to safety, quality and economic imperatives, is a growing trend that will be emphasized.

An innovative feature of this course is that individual sections of the program can be attended on a daily basis, allowing course content to be tailored to the unique interests and requirements of each registrant. The purpose of this course is to provide the registrant with an overview of state-of-the-art imaging methods as they pertain to clinical practice, and to introduce advances in the field in terms of imaging technology, and disease diagnosis and management.

The course is designed to examine the practical aspects of established CT, MR, US, PET and Interventional techniques, as well as to introduce new techniques and applications for these modalities. Plenary sessions have been structured to review pathologic processes and image interpretation, and to update the registrant on advanced applications and image analysis. There is a strong emphasis in the afternoon sessions on challenging cases, and how we approach them.

Learning Objectives
After participating in this activity, clinicians should be able to:

• Evaluate and incorporate current imaging techniques and protocols for sub specialty imaging (Abdominal, Musculoskeletal, Neurologic, Thoracic, Cardiac, Breast, PET/CT, Emergency Medicine, Interventional) into clinical practice to enable accurate diagnosis, dictate best therapy options, and assess response to therapy, which may prompt therapy modification as needed.
• Develop strategies to utilize image-guided MSK procedures, including US guided injections, as both diagnostic and therapeutic tools for patients suffering from upper and lower extremity neuropathies.
• Describe and apply the current Fleischner Society and LUNG RADS guidelines for the management of solid and subsolid pulmonary nodules and understand the rationale for the recommendations.
• Develop strategies to optimize and incorporate a gamut of studies, including CT, MR and PET, in order to accurately stage neoplasms with minimal cost and radiation exposure.
• Develop imaging protocols and techniques to optimize radiation safety and dose reduction in CT, as well as utilize MR imaging in appropriate patient populations, without compromise to diagnostic quality and accuracy of imaging.

Course Format
You may sign up for the entire 5 days or you may tailor the course content and register on a daily basis. The first lecture each day begins at 7:45 am and the last lecture concludes at 5:45 pm.
