The mission of the NYU Center for the Study of Asian American Health (CSAAH) is to reduce health disparities in the Asian American community through research, training and partnership. As a core area of the Center for the Study of Asian American Health, the HDRTP provides training, outreach, and research opportunities for students and health professionals to gain knowledge and skills to address Asian American health disparities.

Position Summary
The Section for Health Equity at NYU School of Medicine’s Department of Population Health is looking for a Fall 2019 Intern. The Center is currently engaged in several projects for which we are looking for intern support: 1. Collaboration with the National Library of Medicine’s HealthReach site to update and create multilingual health information in certain health topic areas to increase accessibility and availability of free health information in different languages; 2. Collaboration with several community partners serving the Asian American, Native Hawaiian, and Pacific Islander communities on an upcoming round of the Community Health Resources and Needs Assessment (CHRNA) project: a large-scale health needs assessment focused on using a community-engaged and community venue-based approach to assess basic demographic and health information; and 3. Collaboration with community-based organizations serving the Bangladeshi, Chinese, and Korean communities to adapt a comprehensive toolkit for detecting cognitive impairment and earlier diagnosis of dementia for older Asian American adult communities, that can be administered in community settings.

Job Responsibilities
The individual will assist in the development, adaptation, and dissemination of culturally and linguistically tailored, easy-to-read, translated health education materials targeting Asian American community audiences with low English proficiency (LEP). Additionally, the intern will contribute to the development of community-facing training materials to support CHRNA community and health center partners’ research capacity and ability to administer the CHRNA survey tool with diverse, low-income and LEP Asian American, Native Hawaiian, and Pacific Islander communities, including. Interns may also have an opportunity to create and organize a database (RedCap) and assist with data cleaning and data analysis related to the CHRNA project, as well as other responsibilities as assigned.

Working Conditions: Standard office environment
Preferred work hours: 15 hrs/week
Desired start date: September 16, 2019 (TBC)

Qualifications
- Students and professionals in medicine, public health, social work, nursing and other health related fields are encouraged to apply.
- Background or interest in health communication, health education, and community engagement.
- Previous academic or work experience creating health education; must have strong writing skills.
- Excellent organizational, communication, and time management skills, with high attention to detail.
- Excellent computer skills (use of MS Office Suite, internet research); familiarity with layout and design
- Ability to work independently.
- Strong interest and/or familiarity with working alongside Asian American, Native Hawaiian, or Pacific Islander communities.
- Please indicate language fluency (speaking and/or written) in one or more of the following languages: Mandarin, Cantonese, Korean, Vietnamese, Bangladeshi, Punjabi, Urdu, Hindi, or Tagalog. Candidates with language ability are strongly preferred but is not required.
How to Apply: If interested in HDRTP, please send a cover letter, resume, and a completed HDRTP application (available at [bit.ly/nyuhdrtp](http://bit.ly/nyuhdrtp)) to Jennifer Wong at Jennifer.Wong@nyulangone.org. Please include “Health Communications Fall 2019 Intern” in the email heading.
