The mission of the NYU Center for the Study of Asian American Health (CSAAH) is to reduce health disparities in the Asian American community through research, training and partnership. As a core area of the Center for the Study of Asian American Health, the HDRTP provides training, outreach, and research opportunities for students and health professionals to gain knowledge and skills to address Asian American health disparities.

Position Summary
The Section for Health Equity at NYU School of Medicine's Department of Population Health is looking for an intern to support several projects. These include: 1. Learn about underserved Asian American, Native Hawaiian, and Pacific Islander (AA and NHPI) communities’ health concerns and gain exposure to applied CBPR-intervention approaches and products by supporting an upcoming round of the Community Health Resources and Needs Assessment (CHRNA) project: a large-scale health needs assessment using a community-engaged and community venue-based approach to understand basic demographic and health information; 2. Assist with the development of an online-based “Web Hub” resource tool and community dissemination materials; and 3. Collaboration with community-based organizations and community providers serving the Bangladeshi, Chinese, and Korean communities to adapt a comprehensive toolkit for detecting cognitive impairment and earlier diagnosis of dementia for older Asian American adult communities, that can be administered in community settings.

Job Responsibilities
The individual will help develop, adapt, and disseminate research capacity-strengthening resources and tools that support AA and NHPI community-based organizations’ ability to engage in community-focused research. Responsibilities may include survey tool adaptation, creating curricula program components, researching potential webinar speakers, and assisting with training implementation. Additionally, the intern will contribute to the development of community-facing training materials to support CHRNA community and health center partners’ research capacity and ability to administer the CHRNA survey tool with diverse, low-income and LEP AA and NHPI communities. Interns may also have an opportunity to create and organize a database (RedCap) and assist with data cleaning and data analysis related to the CHRNA project, as well as other responsibilities as assigned. Interns may assist with surveys and interviews of CBO staff and providers, as well as development and translation of a toolkit for detection/treatment of cognitive impairment.

Working Conditions: Standard office environment
Preferred work hours: 10-15 hours/week
Desired start date: January 2020

Qualifications
- Students and professionals in medicine, public health, social work, nursing and other health related fields are encouraged to apply.
- Background or interest in health communication, health education, and community engagement.
- Previous experience creating training curriculum or program management; strong writing skill preferred.
- Excellent organizational, communication, and time management skills.
- Ability to work independently.
- Strong interest and/or familiarity with working alongside Asian American, Native Hawaiian, or Pacific Islander communities.
- Fluency in Bengali, Chinese, or Korean a plus.

How to Apply: If interested in HDRTP, please send a cover letter, resume, and a completed HDRTP application (available at bit.ly/nyuhdrtp) to Jennifer Wong at Jennifer.Wong@nyulangone.org. Please include “Health Communications Spring 2020 Intern” in the email heading.
