IMPORTANT ANNOUNCEMENT
CTSI/TREC PRE- AND POST-DOCTORAL TRAINING SUPPORT PROGRAM IN CLINICAL AND TRANSLATIONAL RESEARCH (TL1)

PLEASE DISTRIBUTE AND POST

The Clinical and Translational Science Institute (CTSI) of New York University is pleased to announce the availability of a funding/training program for late-stage pre-doctoral and early-stage post-doctoral scholars conducting research in the area of health care and/or translational medicine.

The program will provide stipend, training and mentoring while emphasizing the scholar’s success within their established research area. The fundamental goal of the program is to help and support scholars as they advance in their research careers, and to provide them with the knowledge and skills to eventually develop into successful, independent researchers. The program encourages productivity, collaborative research and career development.

Late-stage pre-doctoral PhD students who have completed required coursework, as well as early stage post-doctoral research scholars (1-2 years after completion of pre-doctoral training) are eligible to apply. Post-doctoral scholars should be actively engaged in clinical or translational research. Scholars from any unit or school in the University, or with appointments at CTSI-affiliated New York City Health and Hospitals Corporation institutions, are eligible to apply. Applicants must have the support of their research advisor/mentor.

IMPORTANT NOTICE: APPLICATION PROCESS/PROGRAM SCHEDULE
Applications for TL1 funding will be due by 5:00 pm on July 17, 2015. Applicants and their mentors must be prepared to accept TL1 funding for a start date of September 1, 2015. Please contact the Program Coordinator, Claudia Galeano if you have any questions.

Note: Application deadlines are not anticipated to change, but must be considered tentative pending the official notice from the NIH National Center for Advancing Translational Sciences (NCATS).

Additional information about the program and application materials and instructions may be found on the CTSI TL1 website.
