Types of Protocol Review & Monitoring Committee Review

If your Protocol is Cancer related:

- **ADMINISTRATIVE REVIEW**
  - Expedited review by an executive sub-committee as received. Not subject to meeting dates/deadlines
  - Cooperative group trials (GOG & Pre-EOG)
  - Externally Peer Reviewed Trials
  - Any peer-reviewed study supported by an NIH mechanism (i.e. ROIs, UOIs, U10s, POIs, and P50s, etc)

- **FULL BOARD COMMITTEE REVIEW**
  - Subject to a review by the board members at a scheduled meeting, with PI present, subject to meeting dates/deadlines; review of scientific merit, biostatistical plan analysis, and appropriate allocation of resources.
  - Industry Sponsored Trials
  - Investigator Initiated Trials
  - *All interventional studies in which individuals are assigned prospectively by an investigator based on a protocol to receive specific interventions. The participants may receive diagnostic, treatment, behavioral, or other types of interventions. The assignment of the intervention may or may not be random. The participants are followed and biomedical and/or health outcomes are assessed.*
  - Observational studies
    - Image Reviews
    - Tissue Sample Acquisition
    - Database Extraction
    - Registry

**PRMC Approval**

**SUBMIT TO IRB**
