Revised March, 2017
RAPID TURNAROUND

• Routine specimens diagnosed within 24 hours of receipt
• Secure diagnostic report delivery by courier, Internet, fax, and/or overnight mail by FedEx at no additional cost
• Pre-report telephone “alerts” for malignant melanomas, unexpected high-grade malignancies, and serious inflammatory or infectious diseases
• Electronic requisitioning and reporting interface capability with most EMR systems
• 24 Hour access to reports via our NYU Dermatopathology Online Reporting Portal

PERSONALIZED SERVICE

• Pathologist readily available to discuss cases over the phone
• Personalized consultation and case review with a board-certified dermatopathologist

SPECIALIZED EXPERTISE

• High-quality routine H&E, special stains, and immunohistochemistry when necessary
• Expert diagnostic interpretation of difficult neoplastic and inflammatory skin diseases, melanocytic lesions, and alopecia cases
• For more complex cases requiring special studies for definitive diagnosis, our dermatopathologist will provide a preliminary interpretation
• Cutting edge processing and interpretation of specimens that require Direct Immunofluorescence (DIF). Please call to request DIF kits.
