

## Non Smoking Policy

### Purpose

As part of the Medical Center's commitment to public health and safety and the prevention and treatment of disease, smoking, except where designated in this policy, is prohibited in **all** areas of and in **all** buildings of the Medical Center. This policy is in effect for all employees of NYU Medical Center, as well as students, patients, and visitors.

### Policy

Smoking is prohibited in all areas of the Medical Center, **which includes the courtyards and gardens**, along with all other outdoor areas between and in front of Medical Center buildings. Similarly, smoking is also prohibited on the roof of Medical Center buildings. The **only** area where smoking is allowed is on 30th street, east of the School of Medicine entrance up to the FDR service drive.

If students are found violating the policy, they will be subject to the School of Medicine Student Disciplinary Process.
