Cutting Edge Review Course in Medical Toxicology

March 15-17, 2017
The New York City Poison Control Center
455 First Avenue, New York, NY 10016

COURSE DESCRIPTION
This three-day course will be instructed by dynamic faculty from the NYU Ronald O. Perelman Department of Emergency Medicine and the New York City Poison Control Center and is intended to teach learners of all backgrounds about the exciting world of Medical Toxicology. The course will offer:
- Small Group Interactive Workshops on GI Decontamination and reading Toxicologic ECGs.
- A High-Fidelity Simulation Session

COURSE OBJECTIVES
Through participation in lectures, workshops and simulations, attendees will be able to:
- Acquire practical and appropriate information regarding both common and serious clinical problems in the care of the poisoned patient.
- Utilize the proper approach to treatment of the acutely poisoned patient.
- Critically compare the various gastrointestinal decontamination techniques and identify scenarios in which each is most likely to be beneficial.
- Interpret laboratory data and ECGs to assist in the diagnosis and management of the poisoned patient.
- Develop an evidence-based approach to the treatment of common and complex toxicologic problems.
- Synthesize existing evidence to develop a rational approach to the treatment of severely agitated patients.

COURSE DIRECTORS
- Mark Su, MD, MPH
- Daniel Lugassy, MD
- Maria Mercurio-Zappala, RPh, MS
- Donna Vardakis, RN, CSPI
