Frederica Perera, Dr. P.H. - Columbia University School of Public Health
Professor of Public Health, Division of Environmental Health Sciences
Research Interests: Children's environmental health; molecular epidemiology; environment-susceptibility interactions in cancer and developmental damage; breast and lung cancer; chemoprevention, cancer prevention, and risk assessment
E-Mail: fp1@columbia.edu

Joan Reibman, M.D. - New York University School of Medicine
Associate Professor of Medicine; Director, Asthma Center, Bellevue Hospital
Research Interests: Asthma; respiratory tract diseases; control/regulation of inflammatory responses in the lung
E-Mail: reibmj01@gcrc.med.nyu.edu

George Thurston, Sc.D - New York University School of Medicine
Associate Professor of Environmental Medicine; Director; NYU-NIEHS Community Outreach and Education Program
Research Interests: Human health effects of inhaled air pollutants; particle air pollution, asthma; air pollution meteorology and modeling
E-Mail: thurston@env.med.nyu.edu

Paulo Toniolo, Ph.D. - New York University School of Medicine
Professor of Obstetrics & Gynecology; Professor of Environmental Medicine
Research Interests: Epidemiology of breast cancer
E-Mail: tonioplit01@gcrc.med.nyu.edu

Sherri Weiser, Ph.D - New York University
OIOC Senior Manager Psychological Services; Adjunct Assistant Professor, Graduate Program in Ergonomics and Biomechanics
Research Interests: Traumatic stress syndrome; biopsychosocial models; personality and health; occupational and environmental stress; musculoskeletal complaints; and cognitive-behavioral pain management
Email: sw20@nyu.edu

Mary S. Wolff, Ph.D. - Mt. Sinai
Professor of Community Medicine; Director of Division of Environmental Health Science; PI of the EPA/NIEHS Center for Children's Environmental Health Research at Mount Sinai

Rae Zimmerman, Ph.D. - New York University, Robert F. Wagner School of Public Service
Professor of Planning and Public Administration; Director, Institute for Civil Infrastructure Systems (ICIS)
Research Interests: Civil infrastructure systems; perspectives of the applied social science and engineering disciplines to support transportation, water, energy, communication, and waste management systems.
E-Mail: rae.zimmerman@nyu.edu

The legacy of the World Trade Center disaster will be with us for many years to come. New York University’s Environmental Health Center, along with other National Institute of Environmental Health Sciences (NIEHS) sponsored centers in the New York City metro area, have begun to evaluate environmental health concerns arising from the World Trade Center disaster. The following NIEHS centers are represented today:

- New York University School of Medicine (NYU SOM)
- Environmental and Occupational Health Sciences Institute (EOHSI), University of Medicine and Dentistry of New Jersey-Robert Wood Johnson Medical School (UMDNJ-RWJMS)
- Columbia University School of Public Health (Center for Children's Environmental Disease Prevention)
- Mt. Sinai School of Medicine (Center for Children’s Environmental and Disease Prevention)

The speakers on this panel were carefully selected because of their area of expertise and their direct involvement with their environmental health assessments of the World Trade Center disaster. In addition to the collaborative efforts being made by each center, specific topics will be addressed giving you an opportunity to ask questions during our Q & A session. These topics include air quality, asbestos, odors, stress/mental health, pregnancy and fertility issues. The panel will answer as many questions to the best of their current knowledge of the situation. If your question is not fully addressed, please refer to the end of the program for a list of resources you may find helpful.

We would like to thank our co-sponsors, the National Institute of Environmental Health Sciences (Grant ESO1247) and the NY Academy of Sciences. We also wish to thank and acknowledge the presenters and the members of our expert panel, as well as all those who have helped make these presentations and the research reported here possible. This includes those who assisted the various World Trade Center related NIEHS Center research efforts discussed at this forum, as well as the various institutions that have graciously made space or facilities available to NIEHS Center researchers since September 11th.
