Description and Objectives
This conference will prepare graduate medical education (GME) leaders for the changing policy, practice, and economic environment impacting GME, and to develop strategies that optimize our response to these challenges.

Core Questions:
How is the changing policy, practice, and economic environment impacting GME?
What should GME prepare physicians to do in the practice of the future?
How can GME programs transform the structure of their residency programs to adapt to these changes?
How can institutions prepare for the financial implications for these changes?
How do we align GME programs with the health care needs of vulnerable populations?

Leading thinkers in the field will discuss policy and financial structure and innovative practices.

Registration
Space is limited. Early registration is encouraged. Register online by May 15, 2015
