

## New & Notable

### Translational Immunology Center (TrIC) Pathology Faculty Leads Immunology Research at NYU Langone Health

Boris Reizis, PhD, professor in the Departments of Pathology and Medicine, is the director of the new Translational Immunology Center (TrIC) at NYU Langone Health.

“I am sure that Boris will be an impressive leader for the immunology community at NYULH. He will have the support of all of us at the department of Pathology”- said Iannis Aifantis, PhD, Chair of Pathology department - “As somebody who came to NYU 14 years ago because of its tradition and excellence in immunology, such an Immunology Center was always a dream. I am excited to see the launch of TrIC and proud to be a future member!” - he declared when officially congratulating Dr. Reizis for being the founding Director.

The Translational Immunology Center (TrIC) will coordinate immunology-related research efforts across NYU Langone and integrate them with clinical centers and programs such as Perlmutter Cancer Center’s [Tumor Immunology Research Program](#), the [Judith and Stewart Colton Center for Autoimmunity](#), the [Vaccine Center](#), [NYU Langone Transplant Institute](#), and the Department of Pathology’s [Ion Channels and Immunity Program](#).

“Our mission is to build on the breadth of our immunology research and the strengths of our clinical enterprise to foster cross-disciplinary collaborations and facilitate translational studies of human diseases and identify novel treatments.” said Dr Reizis explaining the main idea of the initiative.

Congratulations Dr. Reizis!!!

Stay tuned for the launch of the TrIC website.
