

Be Thankful for New York State's Successful Tobacco Control Program!

The Manhattan Tobacco Cessation Program (MTCP) is one of 19 cessation centers in New York State funded by the New York State Department of Health Tobacco Control Program and is housed at the School of Medicine at New York University.

November is National Lung Cancer Awareness Month and November 17 was the Great American Smoke Out. Below are some pictures of our community education and outreach activities during the Great American Smoke Out events we supported throughout the city.

Students at the New School using a CO monitor

Materials on a table at the Chinatown YMCA GASO event

MTCP's GASO activities included:

- A speech at CUNY's City College on facts and myths of tobacco use and provided treatment options and referral information for those interested in quitting
- A speech on tobacco cessation, medications, second hand smoke, and hookah for the Medicaid Managed Care Plan, Neighborhood Health Providers
- Tabling at the Chinatown YMCA
- Tabling at New York University's Bobst Library on the main campus
